

Miguel Jesus

Senior Product Designer

Porto, Portugal · miguel.jss@gmail.com · linkedin.com/in/migueljss · migueljss.com

SUMMARY

Product designer with over a decade in B2B SaaS and mobile. For seven years I designed Team Files, a collaboration app for Jira and Confluence used by over 9,000 companies, working day to day with engineering and product on a team that grew to seven. My best work has come from close collaboration: a design system developers built from directly, research that changed a product's direction, and accessibility fixes that actually shipped. I'm looking to bring that into a larger design team, where critique and shared standards raise the bar.

SKILLS

- **Product & UX:** Product discovery, user research, usability testing, information architecture, interaction design, prototyping, service design, design systems, design tokens, accessibility (WCAG), experimentation and conversion.
- **UI & Visual:** Interface and visual design, responsive and mobile UI, data visualization, iconography, typography, branding.
- **Content:** UX writing, product documentation.
- **Collaboration:** Cross-functional teams, Agile/Scrum, developer handoff, stakeholder communication, mentoring.
- **Front-end:** HTML and CSS; prototyping in code; shipping production sites with Claude Code.
- **AI Tools:** Claude, Claude Code, ChatGPT, Perplexity, Figma AI, and Figma Make for research, UX writing, and exploration; Claude with Notion as a shared, editable knowledge base.
- **Domains:** B2B SaaS, Atlassian ecosystem, mobile (iOS/Android), food-tech.
- **Tools:** Figma, Sketch, Adobe CC, Jira, Confluence, Notion.

WORK EXPERIENCE

Self-employed

INDEPENDENT PRODUCT DESIGNER

October 2025 to Present · Porto, Portugal

- Rebuilt my portfolio site, migueljss.com, with Claude Code, including in-depth case studies on Team Files, MyFoodways, and Food Save.
- Designing and building a board game library app, taking it from mobile web to native iOS with AI-assisted development.

ikuTeam

SENIOR PRODUCT DESIGNER & CO-FOUNDER

January 2018 to September 2025 · Porto, Portugal

Product designer and one of three co-founders at ikuTeam, a bootstrapped team that grew to seven, building Team Files and Office Editor for the Atlassian Marketplace. Part-time alongside Foodways until 2020, full time from 2021. Team Files, the flagship, reached over 9,000 companies across Jira and Confluence, rated 3.7 out of 4 during my tenure.

- Shaped the roadmap with our design-minded product owner, prioritizing releases from user feedback and analytics.
- Worked through every flow proposal with our CTO for feasibility and scope before it went into a spec, and validated changes through interviews, usability tests, and internal beta releases.
- Rebuilt first-run onboarding around empty states and an in-app tour for users meeting the app through an admin install.
- Ran a heuristic review of the full product to improve trial-to-paid conversion, turning each finding into a Jira story the team shipped sprint by sprint.
- Worked with engineering and support to reduce churn year over year, from a high in 2020 to in line with the Atlassian Marketplace average.
- Set the UX direction for the Forge rebuild, streamlining core flows and aligning with current Atlassian patterns.
- Built a design system extending the Atlassian Design System, which engineers adopted in code during the rebuild.
- Mentored developers on UI and UX questions, and made the case for design consistency as a driver of product quality.
- Also designed ikuTeam's brand and coded the marketing site, running ongoing tagline, keyword, and call-to-action experiments across the site and Marketplace listing to drive trial starts.

Foodways

PRODUCT DESIGNER

March 2018 to December 2020 · Lisbon, Portugal, then remote

Product designer for Foodways' iOS and Android apps, working with PMs in Switzerland and Lisbon, the Swiss team, and an external studio. Full time in Lisbon, then a remote contractor from mid-2019.

- Designed MyFoodways end to end, an ingredient-led recipe app that reached over 6,000 downloads in its first six months, helping households cook with what they already had.
- Ran research with kitchen managers and, together with the Swiss team, pivoted Food Save from a competition concept to a practical library of waste-reducing measures.
- Designed the Waste Tracker, a companion data product for logging and visualizing kitchen waste, including the flows, data visualizations, and printed labels that tied bins to screens.
- Flagged WCAG contrast failures in the agency's palette and shipped AA-compliant patterns where scope allowed.
- Stepped in as interim PM during the PM's paternity leave, running vendor selection and recommending a shared build over native builds to the Swiss team for a joint decision.

TOPDOX: Team Documents

PRODUCT DESIGNER & CO-FOUNDER

March 2014 to November 2017 · Porto, Portugal

- Designed the web and mobile apps and brand for a document management product, later extended into a B2B integration for HipChat and Atlassian tools.
- Mentored a junior designer who joined in the second half of my time there.
- Learned that individual users valued the app but wouldn't pay for it, while companies would, the insight my co-founder and I carried into ikuTeam.

Doist

UI/UX DESIGNER

February 2013 to March 2014 · Porto, Portugal

- Refreshed the Doist brand (logo, typography, visual language), reviewed by an external brand designer.
- Designed websites for Todoist, Doist, and Wedoist.
- Designed the Android app's UI and artwork, working closely with the Android developers, and co-developed onboarding concepts with the team's iOS designer.
- Designed the visual scheduler across Android, iOS, and web.

TOP Research

GRAPHIC & UI DESIGNER

January 2012 to March 2014 · Porto, Portugal

Graphic, web, and iOS interface design for a bootstrapped research and technology venture that laid the groundwork for TOPDOX. Part-time alongside Doist from 2013.

INEGI/Mercatura

GRAPHIC & WEB DESIGNER

September 2006 to June 2011 · Porto, Portugal

Branding, website, and intranet design for a technology and engineering research institute.

Gabinete de Imagem FJJM

GRAPHIC & WEB DESIGNER

July 2005 to August 2006 · Aveiro, Portugal

Print and web design for Universidade de Aveiro and Fábrica CCV.

EDUCATION

Universidade de Aveiro

LICENCIATURA (BACHELOR'S), DESIGN

2001 to 2005
