Miguel Jesus

Senior Product Designer · B2B SaaS and mobile

Porto, Portugal · miguel.jss@gmail.com · linkedin.com/in/migueljss · Portfolio: migueljss.com

SUMMARY

Senior product designer with over a decade in B2B SaaS and mobile. For seven years I led design on Team Files, a file collaboration app for Jira and Confluence with over 9,000 active installations, across onboarding, trial starts, churn reduction, and a design system engineers adopted in code. I work day to day with engineering and product, and prototype in code with AI tools when that gets to an answer faster.

WORK EXPERIENCE

Self-employed

INDEPENDENT PRODUCT DESIGNER

October 2025 to Present · Porto, Portugal

- Designing and building miPlay, an app that lets a group of friends browse their combined board game collections and pick what to play, tested with my own game group.
- Built the first version in React Native with a Supabase backend; now rebuilding it natively in SwiftUI, with a development build already running on iOS and the app structured so Android can follow.
- Applying the iOS 27 HIG in the native version, adopting Liquid Glass and adding light and dark themes (the first version was dark only), built with an AI-assisted design-to-code workflow in Claude Code.

ikuTeam

SENIOR PRODUCT DESIGNER & CO-FOUNDER

January 2018 to September 2025 · Porto, Portugal

Product designer and one of three co-founders at ikuTeam, bootstrapped at first and later backed by Atlassian Ventures. The team grew to seven, building Team Files and Office Editor for the Atlassian Marketplace. Part-time alongside Foodways until 2020, full-time from 2021. Team Files, the flagship, was rated 3.7 out of 4 on the Marketplace during my tenure.

- Shaped the roadmap with our design-minded product owner, prioritizing releases from user feedback and analytics.
- Worked through every flow proposal with our CTO for feasibility and scope before it went into a spec, and validated changes through internal testing and beta releases.
- Rebuilt first-run onboarding around empty states and an in-app tour for users meeting the app through an admin install.
- Ran a heuristic review of the full product to make it clearer, easier to use, and more accessible, turning each finding into a Jira story the team shipped sprint by sprint.
- Worked with engineering and support to cut churn, set as a yearly KPI, from an index close to 3 to around 1, the Atlassian Marketplace average.
- Built a design system extending the Atlassian Design System, then set the UX direction for the Forge rebuild, streamlining core flows that engineers built directly from its components.
- Also designed ikuTeam's brand and coded the marketing site, running ongoing tagline, keyword, and call-to-action experiments across the site and Marketplace listing to drive trial starts.

Foodways

PRODUCT DESIGNER

March 2018 to December 2020 · Lisbon, Portugal, then remote

Product designer for Foodways' iOS and Android apps, working with PMs in Switzerland and Lisbon, the Swiss team, and an external studio. Full-time in Lisbon, then a remote contractor from mid-2019.

- Designed MyFoodways, an ingredient-led recipe app that reached over 6,000 downloads in its first six months, helping households cook with what they already had.
- Ran research with kitchen managers and, together with the Swiss team, pivoted Food Save from a competition concept to a practical library of waste-reducing measures.
- Designed the Waste Tracker, a companion data product for logging and visualizing kitchen waste, including the flows, data visualizations, and printed labels that tied bins to screens.
- Flagged WCAG contrast failures in the agency's palette and shipped AA-compliant patterns where scope allowed.
- Stepped in as interim PM during the PM's paternity leave, running vendor selection and recommending a shared build over native builds to the Swiss team, who approved it.

TOPDOX: Team Documents

PRODUCT DESIGNER & CO-FOUNDER

March 2014 to November 2017 · Porto, Portugal

- Designed the web and mobile apps and brand for a document management product, later extended into a B2B integration for HipChat and Atlassian tools.
- Mentored a junior designer who joined in the second half of my time there.
- Learned that individual users valued the app but wouldn't pay for it, while companies would, the insight my co-founder and I carried into ikuTeam.

Doist

UI/UX DESIGNER

February 2013 to March 2014 · Porto, Portugal

- Refreshed the Doist brand (logo, typography, visual language), reviewed by an external brand designer.
- Designed websites for Todoist, Doist, and Wedoist.
- Designed the Android app's UI and artwork, working closely with the Android developers, and co-developed onboarding concepts with the team's iOS designer.
- Designed the visual scheduler across Android, iOS, and web.

Earlier experience

GRAPHIC, WEB & UI DESIGNER

2005 to 2014 · Aveiro and Porto, Portugal

Graphic and web design for Gabinete de Imagem FJJM and INEGI/Mercatura, and iOS interface design for TOP Research, the venture that led to TOPDOX.

SKILLS

- **Product & UX:** Product discovery, user research, usability testing, information architecture, interaction design, prototyping, service design, design systems, design tokens, accessibility (WCAG), experimentation and conversion.
- **UI & Visual:** Interface and visual design, responsive and mobile UI, data visualization, iconography, typography, branding.
- **Content:** UX writing, product documentation.
- **Collaboration:** Cross-functional teams, Agile/Scrum, developer handoff, stakeholder communication, mentoring.
- **Front-end:** HTML & CSS; prototyping in code; building with Claude Code, from production sites to a native SwiftUI app.
- **AI Tools:** Claude, Claude Code, ChatGPT, Perplexity, Figma AI, and Figma Make for research, UX writing, and exploration; Claude with Notion as a shared, editable knowledge base.
- **Domains:** B2B SaaS, Atlassian ecosystem, mobile (iOS/Android), food-tech.
- **Tools:** Figma, Sketch, Adobe CC, Jira, Confluence, Notion.

EDUCATION

Universidade de Aveiro

LICENCIATURA (BACHELOR'S), DESIGN

2001 to 2005

LANGUAGES

- **Portuguese:** Native
- **English:** Full professional proficiency (C1)
- **Spanish:** Limited working proficiency (B1)
