

Miguel Jesus

Senior Product Designer

Porto, Portugal · miguel.jss@gmail.com · linkedin.com/in/migueljss · migueljss.com

Senior Product Designer with 20+ years across graphic, web, and product design, with the last decade focused on UX/UI for SaaS and mobile products. I've co-founded and led design for collaboration tools in the Atlassian ecosystem, and designed sustainability-driven food-tech apps, owning the product experience end-to-end, from discovery through launch and iteration. I work across the full design stack: product strategy, UX research, interaction design, design systems, and HTML & CSS prototyping. I use AI tools actively across ideation, writing, research, and visual exploration to move faster and think more clearly. I connect user needs with business goals to ship intuitive, adoption-driving products, and I'm equally comfortable going 0→1 or scaling what already works.

CORE SKILLS & TOOLS

Product & UX	Product discovery, UX strategy, user research, information architecture, user flows, interaction design, usability testing, design systems, accessibility
UI & Visual	Interface design, responsive layouts, iconography, typography, branding, design tokens, component libraries
Front-end	HTML & CSS — prototyping in code and building production marketing sites
AI Workflow	Ideation and concept exploration, copy and UX writing, image generation, research (Claude, ChatGPT), AI features in Figma
Domains	B2B SaaS, collaboration tools, Atlassian ecosystem, food-tech, mobile (iOS/Android), sustainability
Tools	Figma, Sketch, Adobe CC, Affinity, Jira, Confluence

EXPERIENCE

ikuTeam

CO-FOUNDER & FOUNDING DESIGNER

January 2018 – September 2025 · Porto, Portugal

Co-founded and led design for ikuTeam's file sharing and collaboration apps, serving thousands of Atlassian users across Jira and Confluence.

- Defined product vision, roadmap, and UX strategy with engineering and PM, translating user feedback and analytics into prioritized feature releases.
- Designed core collaboration features, including file previews, permissions, and automations, that drove user adoption and retention.
- Built and maintained a design system extending Atlassian's component library, adding custom components, aligning with their tokens, and ensuring a seamless, native-feeling experience for Jira and Confluence users.
- Led user research (interviews, usability tests, beta feedback) to validate hypotheses and refine flows, improving task completion and reducing friction.
- Designed and hand-coded the marketing site in HTML and CSS, owning the full brand and communication experience.
- Established brand identity and visual language across product UI, marketing site, and customer communications.

Foodways

PRODUCT DESIGNER

March 2018 – December 2020 · Lisbon, Portugal

Sole designer for Foodways mobile apps (iOS/Android) focused on sustainable food practices and reducing waste.

- Designed end-to-end journeys for ingredient-led recipe search, balancing user goals with business KPIs.
- Conducted user research and usability testing to validate design decisions and refine information architecture, improving discoverability and engagement.
- Created high-fidelity UI and design specs for engineering handoff, ensuring quality implementation and accessibility.
- Collaborated with product and engineering to scope features, manage design debt, and ship iterative improvements aligned with the roadmap.
- Delivered marketing and communication assets to support app launches and user acquisition.

TOPDOX – Team Documents

CO-FOUNDER & FOUNDING DESIGNER

March 2014 – November 2017 · Porto, Portugal

Co-founded TOPDOX and shaped company mission, product strategy, and design direction for B2C document management ecosystem.

- Defined product vision and UX strategy for document management and collaboration features, aligning design with business goals and user needs.
- Developed brand identity, visual design system, and communication strategy across product, marketing, and sales.
- Designed user flows, wireframes, and interfaces for web and mobile apps, owning the end-to-end design process.
- Participated in the Rockstart Web & Mobile Accelerator (Amsterdam, 2014), working with international mentors on product strategy, business model, and fundraising.

Doist

GRAPHIC & UI/UX DESIGNER

February 2013 – April 2014 · Porto, Portugal

- Refreshed the Doist brand identity with a new logo, typography, and visual language.
- Designed websites for Doist, Todoist, and Wedoist, establishing visual identity and user-centered layouts.
- Designed product UI components and artwork for iOS/Android apps, including visual scheduler and onboarding flows.

TOP Research

GRAPHIC & UI DESIGNER

January 2012 – March 2014 · Porto, Portugal

Graphic design, web design, and iOS app interface design for research and technology projects, with a focus on information design, branding, and UI consistency.

INEGI/Mercatura

GRAPHIC & WEB DESIGNER

September 2006 – June 2011 · Porto, Portugal

Branding, website and intranet design, and visual design for a technology and engineering research institute. Worked on multi-platform digital products and corporate identity systems.

Gabinete de Imagem FJJM

GRAPHIC & WEB DESIGNER

July 2005 – August 2006 · Aveiro, Portugal

Graphic design projects (print and web) for Universidade de Aveiro and Fábrica CCV.
